

Pilgrim

UK

Pilgrim is a bitter-type variety. It was developed by Wye Hops Ltd and gained European Plant Variety Rights in 2006. It has very good resistance to wilt disease and is being planted in areas where this disease is present, often replacing 'Wye Target'. Bred from Yeoman in the late 1990's, Pilgrim is a dual-purpose hop, rich in oils and with good storage potential.

Analytical values

Type	Bitter
Growing Area	UK
Lineage	It is a half-sister to 'First Gold', having the same father. Its mother is from breeding lines derived from 'Wye Challenger' and 'Wye Target'.
α -acids*	10.0 - 13.0 %
β -acids	4.0 - 5.5 %
Total Polyphenols	No data
Total oils	1.1 ml/100g
Myrcene	24.0 - 33.0 % of total
Linalool	app. 0.2 % of total

The analytical values are typical for the variety at the time of harvest, but may vary according to crop year, growing region, grower and degree of ageing.

*The alpha content is determined by means of spectrophotometric analyses.
