

Chelan

USA

Cream
Yoghurt
Strawberry
Chocolate
Apple

Chelan, named after the American town in the foothills of the Cascades, is a high alpha variety with a particularly high beta-acid content. Developed as part of the breeding programme conducted by John I.Haas, Inc., this is a medium-maturing variety with excellent storage stability. Chelan has been on the market since 1994 and is a daughter of the cultivar Galena.

Analytical values

Type	High Alpha
Growing Area	USA
Lineage	Daughter of Galena
α -acids*	12.0 - 14.5 %
β -acids	8.5 - 9.8 %
Total Polyphenols	No data
Total oils	1.5 - 1.9 ml/100g
Myrcene	45.0 - 55.0 % of total
Linalool	No data

The analytical values are typical for the variety at the time of harvest, but may vary according to crop year, growing region, grower and degree of ageing.

*The alpha content is determined by means of spectrophotometric analyses.
