

# Galaxy™

Australia

Cassis  
Aniseed  
Blueberries  
Peach  
Blackberries

Due to its impressive flavours the variety Galaxy™ can not only be referred to as bitter hops but also has to be classified as aroma hops. Galaxy™ is grown in Victoria and Tasmania.

## Analytical values

|                   |                                       |
|-------------------|---------------------------------------|
| Type              | Dual Purpose                          |
| Growing Area      | Australia                             |
| Lineage           | 25 % Perle +<br>AUS breeding material |
| $\alpha$ -acids*  | 11.0 - 16.0 %                         |
| $\beta$ -acids    | 5.0 - 6.5 %                           |
| Total Polyphenols | No data                               |
| Total oils        | 2.4 - 2.7 ml/100g                     |
| Myrcene           | 33.0 - 42.0 % of total                |
| Linalool          | No data                               |

The analytical values are typical for the variety at the time of harvest, but may vary according to crop year, growing region, grower and degree of ageing.

\*The alpha content is determined by means of spectrophotometric analyses.
