

Topaz™

Australia

Spicy
Blueberry
Blackberry
Grapefruit
Passion fruit

Topaz™ was originally bred as a high alpha variety mainly for the production of hop extract. Its attractive aroma characteristics were discovered only recently. This cultivar is capable of contributing very pleasant light tropical fruit characters (lychee), with a satisfying earthy background.

Analytical values

Type	High Alpha
Growing Area	Australia
Lineage	Australian breeding material
α-acids*	15.5 - 18.0 %
β-acids	6.0 - 7.0 %
Total Polyphenols	No data
Total oils	1.7 - 2.2 ml/100g
Myrcene	25.0 - 43.0 % of total
Linalool	No data

The analytical values are typical for the variety at the time of harvest, but may vary according to crop year, growing region, grower and degree of ageing.

*The alpha content is determined by means of spectrophotometric analyses.
