

# Mount Hood

USA

Honey  
Lemon cake  
Lemon tea  
Tarragon  
Fennel

The aroma variety Mount Hood, named after the highest mountain in Oregon, was released by the USDA breeding programme in 1989. It is a triploid daughter of Hallertauer Mittelfrüh and a sister hop variety to Liberty. Both display similar analytical values. The distinguishing feature of Mount Hood is its particularly mild aroma.

## Analytical values

Type	Aroma
Growing Area	USA
Lineage	Bred from Hallertauer Mittelfrüh and Liberty
$\alpha$ -acids*	4.0 - 7.0 %
$\beta$ -acids	5.0 - 8.0 %
Total Polyphenols	No data
Total oils	1.2 - 1.7 ml/100g
Myrcene	30.0 - 40.0 % of total
Linalool	0.5 - 0.7 % of total

The analytical values are typical for the variety at the time of harvest, but may vary according to crop year, growing region, grower and degree of ageing.

\*The alpha content is determined by means of spectrophotometric analyses.
