

Super Galena

USA

Juniper
Honey
Strawberries
Plum
Ginger

Super Galena is a super high alpha variety developed by the Hopsteiner breeding program was released in 2006. It has relatively high contents of both alpha and beta acids, making it a good bittering hop with pleasant aroma. Super Galena is comparable to Galena in its aroma and bitterness profile, but offers a substantially higher yield and complete resistance to all current hop powdery mildew strains found in the US.

Analytical values

Type	High Alpha
Growing Area	USA
Lineage	Open pollination
α -acids*	13.0 - 16.0 %
β -acids	8.0 - 10.0 %
Total Polyphenols	No data
Total oils	1.5 - 2.5 ml/100g
Myrcene	45.0 - 60.0 % of total
Linalool	0.3 - 0.5 % of total

The analytical values are typical for the variety at the time of harvest, but may vary according to crop year, growing region, grower and degree of ageing.

*The alpha content is determined by means of spectrophotometric analyses.
